

PRE-EXPORT NOTIFICATION ONLINE LIGHT SYSTEM (PEN Online Light)

Launched in October 2022!

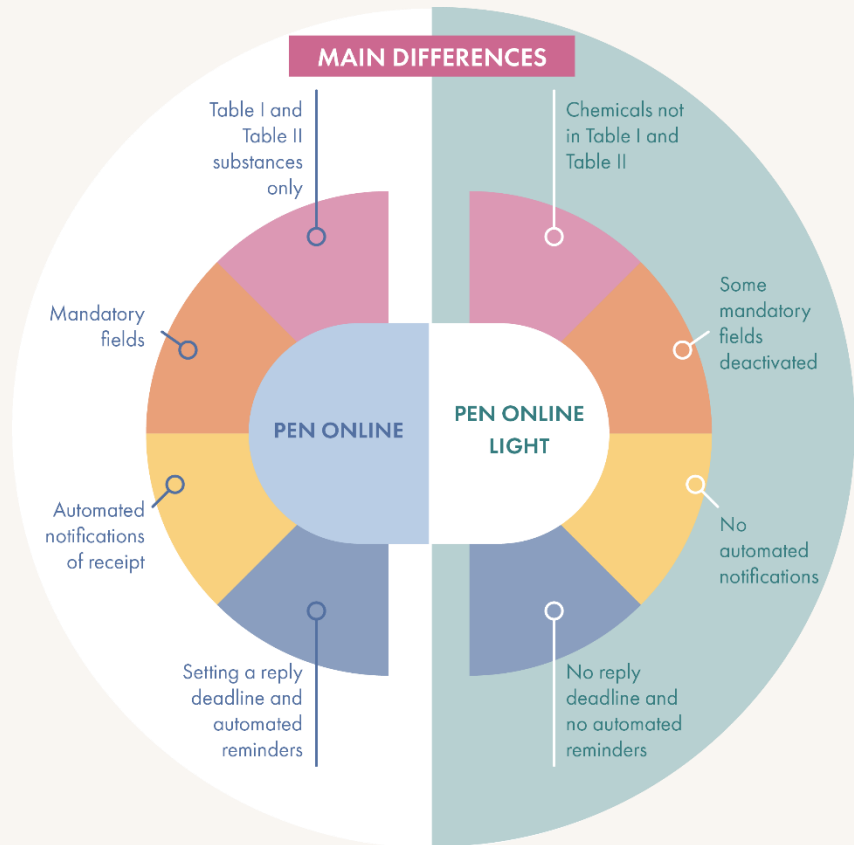

Who is it for?

National authorities concerned with the export of chemicals not included in Table I and II of the 1988 Convention.

When and why use it?

PEN Online Light is a tool that exporting Governments can use to notify importing countries about planned shipments of internationally non-scheduled chemicals on a voluntary basis.

It uses the same technology as PEN Online, which allows countries to exchange information on planned shipments of precursors included in the tables of the 1988 Convention.

Relevant authorities that would like to register to PEN Online Light can do so at pen.incb.org
